Special issue:

ONCASIA: Oncology in Asia

The burden of cancer is spreading from the west to the east. Improved access to the latest technologies and support from the governments are encouraging scientists in various Asian countries to focus on various aspects of cancer research. CARCINOMICS® and Clinical Communications (www.CARCINOMICS.ORG) is bringing out a special issue of the journal entitled, **ONCASIA**, which focuses on Oncology in Asia to assess the needs of Oncology Research and Care in Asia and to celebrate the successes and accomplishments of Oncologists and researchers in the Asian countries.

The special issue will publish multiple types of articles relevant to all sub-specialties of Oncology. Examples of article types include but not limited to original research, short communications, review articles from researchers who have considerable experience working in the field, perspectives on latest and emerging treatment modalities, unique clinical protocols used in the treatment, and perspectives on health economics relevant to Asia. Highly interesting case reports are also considered for peer review.

Manuscripts that describe recent advances in Oncology and treatments from the molecular, technological and therapeutics perspectives will be given high priority for prompt consideration. The journal is especially interested in receiving manuscripts that describe the latest developments in molecular pathogenesis, screening and early detection techniques, tumor markers, diagnosis, and clinical trial outcomes.

Manuscripts should not exceed 3 final PDF pages or approximately 2500 words. Detailed instructions to authors can be found on the journal's web site <http://www.CARCINOMICS.ORG>. All manuscripts will be peer reviewed and published online upon acceptance. Published articles will be compiled as a special edition and will be available in February 2018. For further details, please write to Editor@CARCINOMICS.ORG.

Nominal page charges apply to all accepted manuscripts. Special members of Carcinogenesis Foundation (www.CarciKnow.org) can publish without page charges. Please write to Editor@CARCINOMICS.ORG for details before submitting the manuscripts.
